July 2026

From the workshop to the book: stories arrive in Turin

The official presentation of the book and the audiobook at the Salone Internazionale del Libro di Torino 2026.

A project that becomes a book

On May 18, 2026, **NARRADRAMA** reached one of the most important milestones of the project with the official presentation of the book *The Power of Storytelling for Youth* at the Salone Internazionale del Libro di Torino.

The publication includes stories created by young people from Italy and Spain during a journey based on autobiographical writing, fiction, storytelling and drama therapy.

A EUROPEAN TOUR

The event at the Salone Internazionale del Libro di Torino

The meeting brought together Italian and Spanish participants from NARRADRAMA around a shared narrative. Ana Maria Solis (MTS Edizioni, Italy) opened the presentation by situating the project within Erasmus+ and the transnational alliance between Italy and Spain. Maria Teresa Sisinni (MTS Edizioni, Italy) then guided the collective book's journey, from the autobiographical writing of the young Italians to the production of the book and the audiobook.

Domingo Ferrandis (European Social Art, Spain) shared his work with young Spaniards affected by the DANA storm and the Triune Trauma model, where the narrative becomes a tool for personal and relational reconstruction.

The heart of the gathering came with the readings from the book: the voices of the protagonists themselves, in Italian and Spanish, conveying emotion, memory, and hope. Afterward, the floor was passed to the young people, in an open dialogue with the audience based on their experiences in the project.

A journey in which writing, memory, and creativity become tools for connection, expression, and transformation.

NARRADRAMA

The power of storytelling for youth

Presentation of the Erasmus+ project

An Italy-Spain partnership to promote the emotional well-being of young people through storytelling, autobiographical writing, and drama-therapeutic practices.

When stories find their voice...

"Writing can be a witness, not a judge."

Maria Teresa Sisinni

"Every story written was an act of courage. Every story shared, an opportunity to transform experience into hope."

THE PROCESS OF CREATING THE COLLECTIVE BOOK AND THE AUDIOBOOK

The collective e-book and audiobook of the NARRADRAMA project bring together the creative texts produced by young participants from Italy and Spain, who transformed their personal experiences into fictional narratives. Their creation is the natural culmination of the workshop process and results in a tangible, shared, and accessible cultural product.

THE COLLECTIVE BOOK

The compilation of the stories was carried out through the selection and organization of the texts, the editing and proofreading process agreed upon with their authors, the layout and graphic design, until its conversion into a PDF file optimized for reading and free online distribution.

The result is a free digital book, available for download from the project's website.

THE AUDIOBOOK

The audiobook brings the stories to life and makes them more accessible. The texts were adapted for reading aloud. The production of the narrations was supported by artificial intelligence tools and included recording, editing, and exporting in MP3 format. The audiobook is also available for free.

Artificial intelligence does not replace the creative work of the participants, but rather contributes to enhancing the value of their content.

KEEP DISCOVERING NARRADRAMA

NARRADRAMA demonstrated that writing, theater, and autobiographical storytelling can become memory, hope, and transformation.

The stories created by the young people not only resulted in a book, but also in a learning community built between Italy and Spain.
